Amber Park

Front-End Developer

Motivated front-end developer passionate about solving problems with effective and optimized code. Proficient in web designing, developing, and maintaining front-end web applications. Skilled in working harmoniously with cross-functional teams to ensure timely and budget-conscious project delivery.

Experience

Paybilt

Oct 2022 - May 2023

Web Publisher & Front-end Developer

- Designed user-friendly websites and web applications using HTML/CSS/JavaScript and React, with a focus on creating reusable components for future projects.
- Converted Jinja template HTML pages to the template service and rendered data from Flask (Python framework) to HTML for team use.
- Engaged in an agile environment, participating in weekly stand-up meetings, conducting comprehensive code reviews to offer additional insights, and identifying any overlooked code.
- Studied the overall backend process to production and gained familiarity with backend languages such as Flask, Jinja, and Python.

GlobalStakes Consulting

Jan-May 2022

May-August 2021

Web Designer & Web Publisher

- Conducted research in the US/North America and global networks to identify target markets for company services.
- Supported the redesign and branding strategy for the company website.
- Developed and updated website pages using HTML, CSS, and Javascript.
- Edited profile images with image editing software.
- Edited videos and designed beginning and ending covers for all videos.

Programming Assistant & Station Manager

- Provided creative content support for Radio Humber and its media outlets through ideas, concepts, proposals, and solutions.
- Collaborated with the Radio Humber team in developing radio scripts and editing broadcast audio.
- Took on the responsibility of creating web articles related to broadcasting topics and conducting interviews.
- Achieved Hootsuite Platform Certification to enhance social marketing skills and developed a comprehensive social media strategy.
